

Exporting Digital Data from Climate FieldView

Exporting Digital Data from Climate FieldView

Log In and Navigate to Data Section

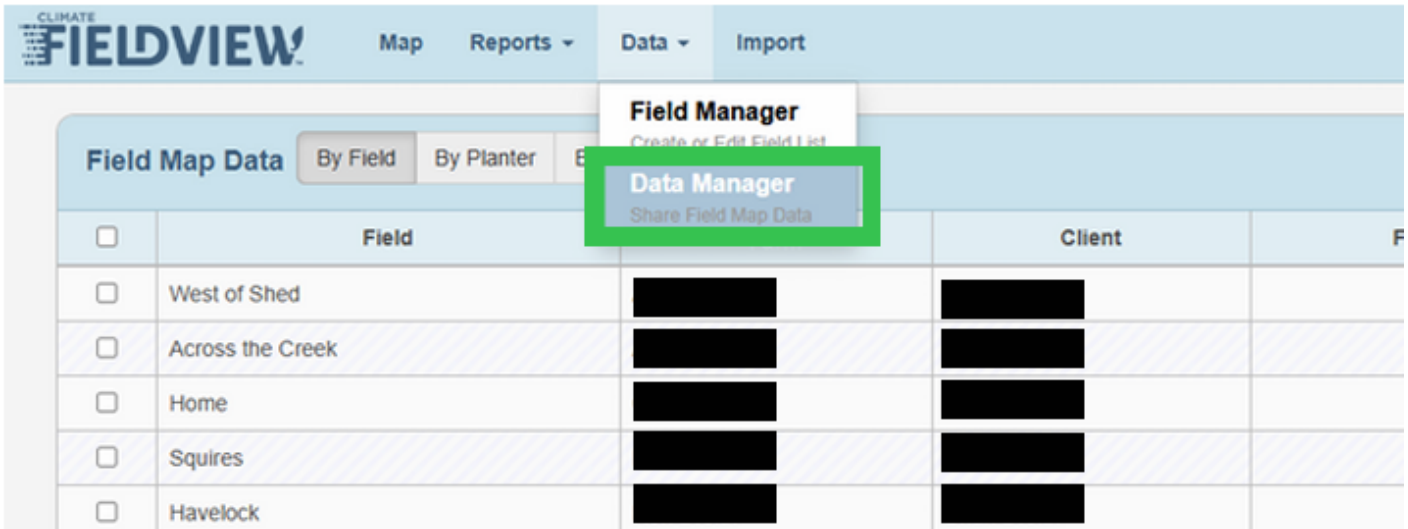

- Sign in to <https://fieldviewplus.com/>

Note: Do not confuse fieldviewplus.com and climate.com. They are different and allow for different types of data export.

The image shows a login form for Climate FieldView. At the top, the logo "CLIMATE FIELDVIEW" is displayed. Below the logo, there are two input fields: "Username" with the text "data@intent.ag" and "Password" with a masked password represented by seven dots. A "Login" button is positioned to the right of the password field. At the bottom left of the form, there is a link that says "Forgot Password?".

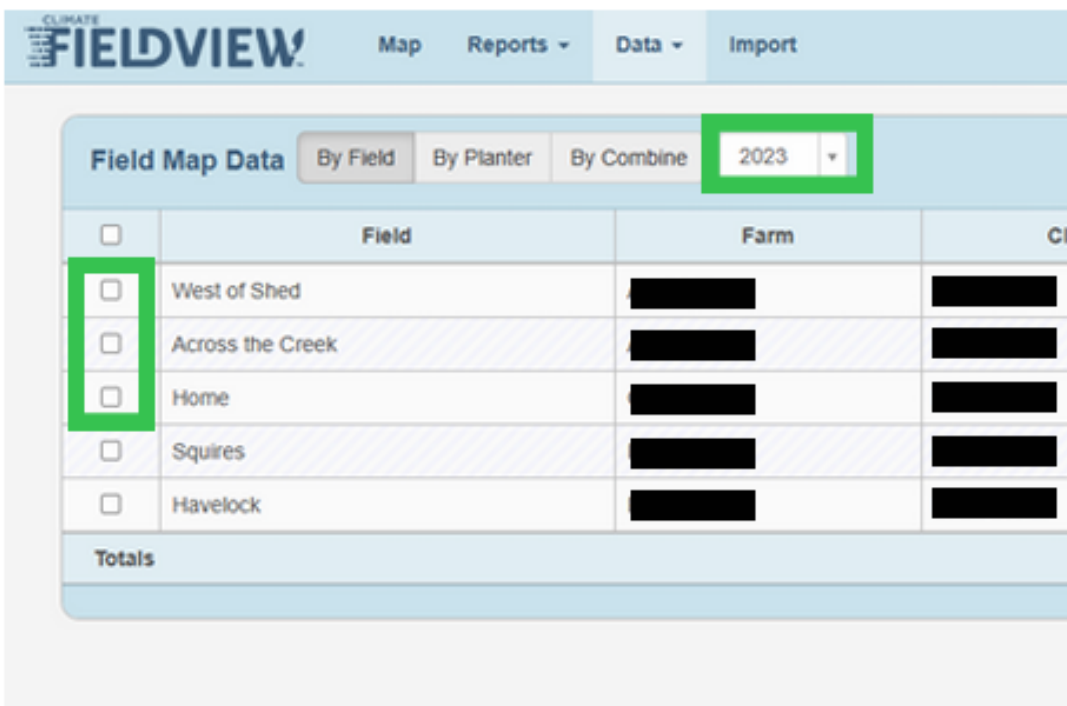

- Select the **Data** tab in the top navigation bar. This is where all field data is stored. Choose the **Data Manager** option in the dropdown list.

Select the Desired Field

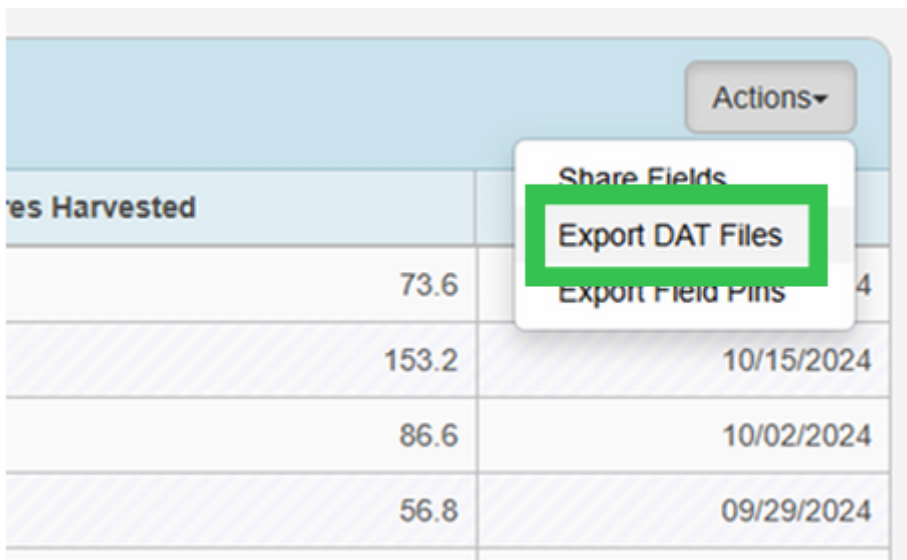

- To export data, check the box next to the desired field name
- Be sure that the year is properly filtered

Note: If your field does not show up on the list, that means there is no associated data for the filtered year.

Export and Download the Data

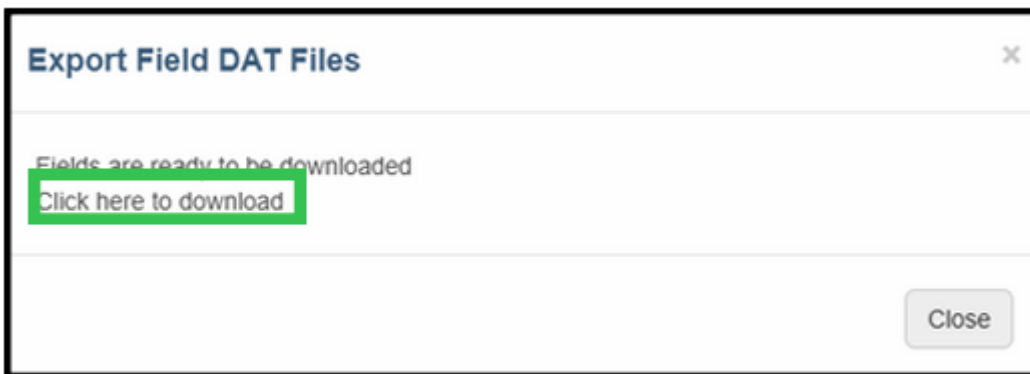

- Locate the **Actions** dropdown menu near the top right of the data table
- Select the **Export DAT Files** option

The screenshot shows a table with a header row and several data rows. An 'Actions' dropdown menu is open over the first data row, with 'Export DAT Files' highlighted in a green box. The table has columns for 'es Harvested', a numerical value, and a date.

es Harvested		
	73.6	4
	153.2	10/15/2024
	86.6	10/02/2024
	56.8	09/29/2024

- Once the export is complete, a download link will appear. Click the link to download the file to your computer

- You can now upload the file to INVISION!
