

February 2024 Release

v2.24.0

New Features:

- **GIS Workstation - Buffer & Smoothness Features:** Introduced a new preview mode for treatment zones when processing application or planting files with adjustable buffer and smoothness settings for tailored configurations before saving.

Zone Tool

Preview and Adjust Treatment Zones

This dialog allows you to preview and fine-tune the treatment zones before saving. Use the buffer tools provided to adjust the zones to your exact requirements.

- **Project Progress:** Redesigned interface and added field data metrics for transparent tracking of tasks from incomplete to in-progress to completed.
