

January 2024 Release

v2.22.0

New Features:

- **Field Visit Planning:** Revamped Field Visit Planning with a new look including a calendar, map, and new assignee roles, ensuring efficient planning for the season.

- **'Untreated' Area Management:** Introducing a toggle feature in Trial Admin Management for customized designation of unzoned areas, tailoring the platform to any trial-specific strategies.

Trial Name

Apogee Harvest

Product(s)

[Add a product](#)

	Color	Name	
	#00695f	Apogee	
	#2196F3	Competitor III	
	#ffc107	Competitor II	
	#e91e63	Competitor I	

Disable Untreated

Country

Enabling this option means the system will not label unzoned areas in the field as 'untreated' or 'standard practice' by default. This gives you more control to define these areas manually.

- **Polygon SHP File Upload:** This feature allows ingestion of multi-polygon treatment files, empowering users to create and tag treatment zones in few clicks.

Revision #4
