January 2025 Release v3.6.0

We're excited to announce the launch of INVISION v3.6.0! This release introduces new enhancements and key bug fixes to improve usability and system performance.

New Features

- **Product Ordering (Work Orders) – Enhanced Trial Operations**
  - Users can now place and manage product orders directly within INVISION, streamlining workflows for trial operations.
  - Admin users have enhanced controls to export and manage orders efficiently.
  - This feature acts as a **scheduled-to-task system**, ensuring structured product distribution and inventory tracking for trial sites.

- **Automated Data Synchronization for Trial Studies – Performance Website Integration**
  - Approved field studies from View Fields now sync nightly, ensuring accurate and up-to-date trial information without manual intervention.
  - This is a **major advancement for companies working within or outside of INVISION**, providing seamless publishing of trial results.
  - Enhances the visibility of trial performance, allowing real-time data integration into external-facing performance websites.

Enhancements

- **Automated Protocol Export Additions**
  - Aggregate **Soil & Yield summary statistics** are now included in protocol exports.
  - Fixed the **.csv extension bug** and corrected coordinate errors in Field Visits Export.
- **Field Notes Enhancements**
  - Users can now **title Field Notes** in View Fields & GIS Workstation, allowing for better organization and retrieval.

Bug Fixes

- Resolved multiple **Climate and John Deere integration** issues to ensure raw data and post-data conversions are processed correctly.
- Fixed a **Mapbox zoom issue**, ensuring fields now center properly in View Fields.
- Addressed a **GIS Workstation auto-exclusion** issue where settings were not saving correctly.
- Fixed an issue where **Field Data by Treatment Zone** was not appearing in Harvest Reports.
- Resolved a bug where **uploaded attachments** were not appearing under Field Data by Zone in View Fields.
- Imported characteristics in **Protocol Field Data (Project Management)** can now be modified before data is uploaded.
